UTHM Creates A MBR Record With A Lecture At The Everest Base Camp

Last update: 20/09/2018

JOHOR BAHRU, Sept 19 (Bernama) -- With only one year of preparation, a group of students and a lecturer from Universiti Tun Hussein Onn (UTHM), Batu Pahat, created a record for the Highest Altitude Lecture Class at a height of 5,550 meters above sea level on top of the Kala Patthar Mountain of Nepal, last Sunday.

Making the memory even sweeter for the group that had undergone a 10-day challenge to reach the Everest Base Camp (EBC), the success was sketched on Malaysia Day and marked with the raising of the Malaysian and UTHM flags.

Describing her teaching experience at the EBC, Dr Nur Kamilah Yusuf said she gave a lecture on a subject of 'Jurutera dan Masyarakat' (Engineers and Community) which carries two credit hours.

"We were on the EBC for three hours for the lecture session and flag-raising mission.

"The EBC mission is the most meaningful gift from us to UTHM in order to further enhance the university's image and visibility in the eyes of the world," he told Bernama when contacted here today.....
