Johor Sultan to award amphibious aircraft to UTHM

BATU PAHAT: The Sultan of Johor Sultan Ibrahim Almarhum Sultan Iskandar is awarding an amphibious utility aircraft, Lake Renegade LA-270, to Universiti Tun Hussein Onn (UTHM) in a show of support for the development of aeronautic programme by the learning institution.

In announcing this, the sultan advised the university to take good care of the American-made aircraft.

"I feel proud because UTHM is offering aeronautic programme which has its own uniqueness, one that combines aspects on aeronautical engineering technology with professional flight licensing that is recognised in the market," he said at the Majlis Titah Tuanku Canselor UTHM which was held in conjunction with the university's 25th anniversary at Dewan Sultan Ibrahim, UTHM, in Parit Raja near here yesterday.

Sultan Ibrahim, who is also UTHM Chancellor, said he had also agreed that the old landing strip at Tanjung Labuh near here, be re-developed and turned into a flight training centre for UTHM students.

According to Sultan Ibrahim, he was made to understand that the Bachelor in Aeronautical Engineering Technology programme was the first in Malaysia and the only one offered in Southeast Asia.

In fact, in the world, there are only four universities offering he combined programme, he added. As such, he expressed

the need for the federal government to support and provide the necessary assistance to ensure success of the programme.

"This aeronautic programme will not only boost UTHM's name, but it will also open up huge opportunities in the development of the aeronautic industry in the country," he stressed.

The Sultan of Johor also expressed his support for the university's proposal to introduce the Bachelor in Rail Transport Engineering Technology programme being that trains had become the main public transport system in the world. "More so, with the implementation of several rail projects in Johor, such as the Gemas-Johor Bahru electrified double-track rail and the high speed train project between Kuala Lumpur and Singapore, it will be the best platform for UTHM to contribute skilled work force," he added.

He suggested the programme to be carried out on joint-venture with industry players to ascertain its quality and in tandem with current technology industrial needs.

He also called on the government to provide bigger allocation for learning institutions, include schools, to produce knowledgeable human capital.

At the event, the Johor Sultan also launched a book 'Dian Desa: Dari Pulau Sialu ke Sungai Layau' published by UTHM.

Also present was UTHM Vice-Chancellor Prof Dr Wahid Razzaly. -Bernama
