

UNIVERSITI TUN HUSSEIN ONN MALAYSIA

**PEPERIKSAAN AKHIR
SEMESTER I
SESI 2014/2015**

NAMA KURSUS	:	KEJURUTERAAN INDUSTRI
KOD KURSUS	:	DAM 31802
PROGRAM	:	2 DAM / 3 DAM
TARIKH PEPERIKSAAN	:	DISEMBER 2014 / JANUARI 2015
JANGKA MASA	:	2 JAM 30 MINIT
ARAHAN	:	JAWAB EMPAT (4) SOALAN SAHAJA DARIPADA ENAM (6) SOALAN.

KERTAS SOALAN INI MENGANDUNGI **DUA PULUH (20)** MUKA SURAT

SOALAN DI DALAM BAHASA MELAYU

- S1** (a) Senaraikan **empat (4)** teknik penentuan lokasi alternatif. (4 markah)
- (b) Jelaskan terminologi ergonomik di bawah:
- (i) Biomekanik (3 markah)
- (ii) Fisiologi kerja (3 markah)
- (c) Syarikat DRC-Hicom merupakan pembekal alat ganti kereta terbaru kepada Syarikat Proton. Berdasarkan **Jadual S1(c)(i)**, Syarikat Proton memerlukan 35,000 unit alat ganti kereta sebulan iaitu suatu jumlah yang tidak mampu dibekalkan oleh kilang-kilang sedia ada Syarikat DRC-Hicom. Oleh itu, Syarikat DRC-Hicom perlu membina sebuah kilang tambahan di salah satu lokasi alternatif iaitu sama ada di Perak atau di Johor. Kos pengangkutan dan kos pengeluaran mengikut lokasi terlibat ditunjukkan pada **Jadual S1(c)(ii)**. Dengan menggunakan “Kaedah Pengangkutan”, tentukan:
- (i) Jumlah kos optimum, jika Perak merupakan lokasi pilihan untuk kilang terbaru ini. (7 markah)
- (ii) Jumlah kos optimum, jika Johor merupakan lokasi pilihan untuk kilang terbaru ini. (7 markah)
- (iii) Dengan membandingkan jumlah kos optimum di antara Perak dan Johor, di manakah lokasi pilihan yang terbaik? (1 markah)
- S2** (a) Senaraikan **empat (4)** keadaan kerja yang perlu dipertimbangkan untuk kajian pengukuran kerja. (4 markah)
- (b) Jelaskan terminologi pengukuran kerja di bawah:
- (i) Kajian Kerja (3 markah)
- (ii) Kajian Pergerakan (3 markah)

- (c) Kajian pensampelan kerja telah diadakan selama 5 hari berturut-turut di sebuah kilang pemasangan radio. Sebanyak 50 pemerhatian telah dibuat dalam tempoh 8 jam bekerja bagi setiap hari seperti di **Jadual S2(c)**. Bilangan unit yang berjaya dihasilkan adalah 3,000 unit untuk seminggu. Kilang ini beroperasi 5 hari seminggu dengan mengambil kira kadaran dan kelegaan sebanyak 98% dan 10%. Kirakan masa piawai dalam (min/unit) bagi proses pemasangan terbabit.
(3 markah)
- (d) Satu kajian pensampelan kerja yang dilakukan di sebuah kilang salutan logam telah menghasilkan data dalam **Jadual S2(d)**. Waktu operasi kilang adalah 8 jam/hari, 5 hari/minggu, 4 minggu/bulan.
- (i) Kirakan masa piawai dalam (min/unit) untuk proses salutan.
(3 markah)
- (ii) Tentukan tempoh kerja lebih masa setiap hari yang harus diatur sekiranya jumlah permintaan ialah 14,000 unit sebulan dan hanya 75% pekerja yang sanggup bekerja lebih masa pada setiap hari bekerja.
(9 markah)
- S3** (a) Senaraikan **empat (4)** langkah di dalam proses ramalan.
(4 markah)
- (b) Terangkan dengan terperinci "Struktur Produk" dalam perancangan kapasiti.
(6 markah)
- (c) Ramalan merupakan suatu kaedah menganggarkan kuantiti permintaan pelanggan pada masa hadapan terhadap sesuatu produk yang perlu disediakan. Berdasarkan **Jadual S3(c)** kirakan:
- (i) Ramalan unit peti TV untuk bulan Oktober dengan menggunakan kaedah "Pelincinan Eksponen Mudah" dengan mengambil $\alpha = 0.3$. Anggapkan ramalan bagi bulan Julai ialah 2,000 unit.
(5 markah)
- (ii) Jumlah braket yang diperlukan untuk memenuhi nilai ramalan pada **Soalan S3(c)(i)** di atas. Rujuk **Rajah S3(c)** struktur produk untuk menjawab soalan.
(5 markah)
- (iii) Bahan mentah braket yang perlu dibeli. Tiga jenis mesin digunakan untuk proses pembuatan braket tersebut. Kadar skrap pada mesin pertama, 4%, mesin ke-2 ialah 3% dan mesin ke-3 ialah 2.5%.
(5 markah)

- S4** (a) Takrifkan terminologi kos inventori di bawah:
- (i) Kos Pesanan (2 markah)
 - (ii) Kos Persediaan (2 markah)
- (b) Syarikat Sonic Computer menggunakan 1,000 transistor setiap bulan bagi proses pemasangan komputer mereka.. Kos seunit transistor ialah \$10, dan kos pegangan inventori seunit bagi masa setahun ialah \$3. Kos pesanan ialah \$30 per pesanan dan syarikat ini beroperasi 200 hari bekerja setahun. Tentukan:
- (i) Kuantiti pesanan optimum (2 markah)
 - (ii) Anggaran bilangan pesanan setiap tahun (2 markah)
 - (iii) Anggaran sela masa antara pesanan (2 markah)
- (c) **Jadual S4(c)(i)** menunjukkan urutan tugas di Syarikat ABC. Sediakan **Jadual S4(c)(ii)** dengan lengkap bersama jawapan yang betul. Setiap jawapan mesti disokong oleh pengiraan yang berkaitan.
- Nota:*
FCFS: First Come, First Served,
DDATE: Earlier Due Date,
SPT: Shortest Processing Time
- (15 markah)
- S5** (a) Senaraikan **empat (4)** sebab keperluan kualiti dalam industri. (4 markah)
- (b) Jelaskan terminologi kawalan kualiti di bawah:
- (i) Deming “Basic Message” (3 markah)
 - (ii) Carta Kawalan (3 markah)
- (c) Data di **Jadual S5(c)(i)** menunjukkan sebanyak 20 sub-kumpulan garispusat aci dengan $n=4$ diambil daripada proses larik
- (i) Hitung dan lengkapkan **Jadual S5(c)(i)** ini. (2 markah)
 - (ii) Sediakan Carta X-bar dan Carta R bagi proses ini. Rujuk **Jadual S5(c)(ii)** dan gunakan **Rajah S5(c)(i)** dan **Rajah S5(c)(ii)** untuk menjawab soalan. (13 markah)

- S6** (a) Senaraikan **empat (4)** jenis “pembaziran” di dalam lini pengeluaran. (4 markah)
- (b) Jelaskan **tiga (3)** tujuan pelaksanaan Just-in-Time (JIT) dalam lini pengeluaran. (6 markah)
- (c) **Rajah S6(c)** menunjukkan struktur produk A1. Maklumat permintaan pelanggan dan status inventori bagi setiap item adalah ditunjukkan dalam **Jadual S6(c)(i)** dan **Jadual S6(c)(ii)**. Sediakan ‘material requirement planning’ (MRP) bagi item G dengan FOQ=300 dan stok keselamatan=90. Isikan maklumat berkaitan dalam **Jadual S6(c)(iii)** dan sertakannya sekali dengan skrip jawapan anda. (15 markah)

-SOALAN TAMAT-

SOALAN DI DALAM BAHASA INGGERIS

- Q1** (a) List down **four (4)** techniques in evaluating alternative locations. (4 marks)
- (b) Describe the ergonomics terminology below:
- (i) Biomechanics (3 marks)
- (ii) Work physiology (3 marks)
- (c) DRC-Hicom Company is new supplier for Proton Bhd. According to **Table Q1(c)(i)**, Proton Company need 35,000 units of spare part per month which the amount cannot be supplied by existing factories of DRC-Hicom Company. Hence, DRC-Hicom Company needs to build an additional factory at alternative location either in Perak or Johor. All transportation cost and production cost by locations has shown in **Table Q1(c)(ii)**. Using Transportation Method, determine:
- (i) Optimum total cost, if Perak is preferred location for the new factory. (7 marks)
- (ii) Optimum total cost, if Johor is preferred location for the new factory. (7 marks)
- (iii) By compare these optimum total cost between Perak and Johor, where is the better location to be selected? (1 marks)
- Q2** (a) List down **four (4)** working conditions that need to be considered for work measurement study. (4 marks)
- (b) Explain the work measurement terminology below:
- (i) Work Study (2 marks)
- (ii) Motion Study (2 marks)
- (c) Work sampling studies were conducted for 5 consecutive days at a radio assembly factory. A total of 50 observations were made during the 8 hours working period for each day as shown in **Table Q2(c)**. The number of units managed to be produced are 3,000 units per week. The factory is operating 5 days a week considering with rating and allowance given by 98% and 10%. Compute the assembly process standard time in (min/unit). (3 marks)

- (d) A work sampling study conducted in a metal coating plant has resulted in the data in **Table Q2(d)**. The plant operation time is 8 hours/day, 5 days/week, 4 weeks/month.
- (i) Compute the standard time in (min/unit) for the coating process. (3 marks)
- (ii) Determine the overtime period per day that must be arranged to meet the customers demand if the total demand for the plant is 14,000 units per month and only 75% employees are willing to work overtime per every working day. (9 marks)

- Q3** (a) List down **four (4)** steps of forecasting process. (4 marks)
- (b) Explain in detail the “Product Structure” in capacity planning. (6 marks)
- (c) Forecasting is the method of anticipating customer future demand in order product to be supplied. According to **Table Q3(c)**, calculate:
- (i) Forecasting unit of TV set for the month October by using “Simple exponential smoothing” method with $\alpha = 0.3$. Assume the forecast for month of July is 2,000 units. (5 marks)
- (ii) The number of bracket required in order to meet a forecasting value at **Question Q3(c)(i)** above. Refer to **Figure Q3(c)** Product Structure to answer a questions. (5 marks)
- (iii) The bracket’s raw material need to be purchased, three type of machines required to fabricated the bracket. The scrap rate for 1st machine is 4%, 2nd machine is 3% and last machine is 2.5%. (5 marks)

- Q4** (a) Define inventory cost terminology below:
- (i) Ordering Cost (2 marks)
- (ii) Setup Cost (2 marks)

- (b) Sonic Computer Company uses 1,000 transistors each month for its computers assembly. The unit cost of each transistor is \$10, and the cost of holding one transistor in inventory for a year is \$3. Ordering cost is \$30 per order. The company operates 200 working days per year. Identify:
- (i) The optimal order quantity (2 marks)
 - (ii) The expected number of orders placed each year (2 marks)
 - (iii) The expected time between orders (2 marks)
- (c) **Table Q4(c)(i)** indicate jobs sequence at ABC Company. Prepare **Table Q4(c)(ii)** completely with your correct answer. Each answer must be support by calculation.
Note:
FCFS: First Come, First Served,
DDATE: Earlier Due Date
SPT: Shortest Processing Time (15 marks)
- Q5** (a) List down **four (4)** reasons of quality requirement in industries. (4 marks)
- (b) Describe the quality control terminology below:
- (i) Deming “Basic Message”. (3 marks)
 - (ii) Control Chart (3 marks)
- (c) Data in **Table Q5(c)(i)** shows a 20 sub-group of shaft diameter with $n = 4$, taken from turning process.
- (i) Compute and complete the **Table Q5(c)(i)**. (2 marks)
 - (ii) Prepare the X-bar chart and R chart for this process. Refer to **Table Q5(c)(ii)** and use **Figure Q5(c)(i)** and **Figure Q5(c)(ii)** as well to answer the questions. (13 marks)

- Q6** (a) List down **four (4)** types of “waste” in lean production. (4 marks)
- (b) Explain **three (3)** purpose of Just-in-Time (JIT) implementation in lean production. (6 marks)
- (c) **Figure Q6(c)** shows product structure for product A1. Data of customer demands and inventory status for all items are shown in **Table Q6(c)(i)** and **Table Q6(c)(ii)**. Prepare a material requirement planning (MRP) for item G with FOQ=300 and safety stock=90. Fill in related information in **Table Q6(c)(iii)** and attach it along with your answer script. (15 marks)

- END OF QUESTION -

PEPERIKSAAAN AKHIR

SEMESTER / SESI : SEM 1/ 2014/2015

PROGRAM : 2 DAM/ 3 DAM

 NAMA KURSUS : KEJURUTERAAN INDUSTRI

PROGRAM : 2 DAM/ 3 DAM
 KOD KURSUS : DAM31802

Formulas:

$$f(x, y) = \sum_{i=1}^n w_i (|x - a_i| + |y - b_i|) \longrightarrow \text{Minisum formula}$$

$$f(x, y) = \max_{1 \leq i \leq n} (|x - a_i| + |y - b_i|)$$

$$\text{First point : } (x_1, y_1) = 0.5 (C_1 - C_3, C_1 + C_3 + C_5)$$

$$\text{Second point : } (x_2, y_2) = 0.5 (C_2 - C_4, C_2 + C_4 - C_5)$$

Minimax formula

$$a = \frac{\sum y - b \sum x}{n}$$

$$b = \frac{n \sum xy - \sum x \sum y}{n \sum x^2 - (\sum x)^2}$$

Regression formula

$$Q^* = \sqrt{\frac{2DS}{H}}$$

$$TC = \frac{D}{Q} S + \frac{Q}{2} H$$

$$Q^* = \sqrt{\frac{2DS}{H(1-d/p)}}$$

$$TC = \frac{D}{Q} S + \frac{Q}{2} H^* (1 - d/p)$$

$$d = \frac{D}{\text{working days / year}}$$
