- (i) elements of the business model and a description of any mechanism or legal framework needed
 - (ii) a high-level site map. Outline any special features, such as registration, tracking or subscriptions that you will need to implement
 - (iii) a sketch of a typical web page. Explain any features you use to enhance performance.
- (15 marks)
- (b) Explain how to market the site for a program mentioned in **Q3(a)** and drive traffic to it. (5 marks)

Q4 Given the following scenario,

A **blog** (a contraction of the term "**weblog**") is a type of website, usually maintained by an individual with regular entries of commentary, descriptions of events, or other material such as graphics or video. Entries are commonly displayed in reverse-chronological order. "Blog" can also be used as a verb, meaning to *maintain* or *add content to a blog*.

Many blogs provide commentary or news on a particular subject; others function as more personal online diaries. A typical blog combines text, images, and links to other blogs, Web pages, and other media related to its topic. The ability for readers to leave comments in an interactive format is an important part of many blogs. Most blogs are primarily textual, although some focus on art (artlog), photographs (photoblog), sketches (sketchblog), videos (vlog), music (MP3 blog), and audio (podcasting). Micro-blogging is another type of blogging, featuring very short posts.

As of December 2007, blog search engine Technorati was tracking more than 112 million blogs.

Discuss **FIVE (5)** principles for building effective and profit making blog.
