FINAL EXAMINATION SEMESTER I SESSION 2016/2017

COURSE NAME : OCCUPATIONAL SAFETY AND HELATH
COURSE CODE : BNQ 20302 / BNP 20402
PROGRAM : BNA/BNB/ BNC/ BNN
EXAMINATION DATE : DISEMBER 2016 / JANUARY 2017
DURATION : 2 HOURS
INSTRUCTION : ANSWER FOUR (4) QUESTION ONLY

TERBUKA

THIS QUESTION PAPER CONTAINS **FIVE (5)** PAGES

CONFIDENTIAL

CONFIDENTIAL

BNQ 20302/BNP 20402

- Q1.** (a) In a risk assessment process, there has guideline under DOSH Malaysia called HIRARC. Interpret the HIRARC based on :-
- (i) Hazarad Identification
 - (ii) Risk Assessment
 - (iii) Risk Control
- (10 marks)
- (b) Illustrate the Risk Matriks Table based on HIRARC Guidelines 2008 establish by DOSH. Elaborate the information regarding :-
- (i) Matriks 5 x 5
 - (ii) Likelihood and severity
 - (iii) Risk Estimation
 - (iv) Colour
- (15 marks)

- Q2.** (a) Explain the terms in detail :-
- (i) Physical Injury
 - (ii) Economic Argument
 - (iii) Humanitarian Argument
- (10 marks)
- (b) NADOOPOD is a regulation under the OSHA 1994. Summarize the NADOOPOD and its function under the law.
- (3 marks)
- (c) Explain briefly **THREE (3)** regulations on occupational safety and health as stated in Act 51
- (6 marks)
- (d) As a Engineer Technologist, explain in detail **Three (3)** reasons why safety important to us.
- (6 marks)

ANTARA mangsa kejadian lif terhempas di Pangaspuri Persiaran Tanjung, Tampoi, Johor Bahru diberi rawatan kecemasan oleh anggota Jabatan Pertahanan Awam (JPA3) semalam. — Gambar SAIFUL NIZAM BAHARI

Seorang maut, 14 cedera lif terhempas dari tingkat tujuh

Oleh WAN HASNAN HASAN

JOHOR BAHRU 1 Julai — Seorang buruh binaan terbunuh manakala 14 pekerja lain cedera setelah lif yang mereka naiki untuk memulakan kerja di pangaspuri sedang dalam pembinaan di Persiaran Tanjung, Tampoi di sini, terjatuh setelah kabelnya terputus pagi ini.

Ketua Polis Daerah Johor Bahru Selatan, Senior Asisten Komisioner II Hashim Mohd Yusof berkata, mangsa yang terbunuh dikenali sebagai Paidi, 40, warga Indonesia.

Menurutnya, kejadian dipercayai berlaku ketika semua pekerja terbabit bersiap untuk memulakan kerja di beberapa bahagian bangunan tersebut kira-kira pukul 8.15 pagi.

"Bagaimanapun ketika lif yang dipasang pada bahagian tepi bangunan tersebut berhenti di tingkat tujuh untuk menurunkan tiga pekerja, kabel lif tiba-tiba terputus lalu terhempas ke tanah," katanya kepada *Utusan Malaysia* ketika dihubungi.

Difahamkan, lif itu kebiasaannya hanya mampu memuatkan tidak lebih 10 orang sahaja.

Paidi yang berada dalam lif berkenaan mati serta-merta setelah mengalami kecederaan teruk di kepala akibat hentakan kuat.

Sepuluh pekerja yang turut berada di dalam lif berkenaan cedera parah manakala empat lagi cedera ringan.

Semua mangsa warga Indonesia itu dikembangkan ke Hospital Sultanah Aminah (HSA). Pangaspuri itu mula dibina sejak April 2002 dan ia dijangka siap Oktober ini.

Seramai 120 pekerja bertugas di kawasan pembinaan pangaspuri setinggi 16 tingkat yang bakal menyediakan sebanyak 134 unit kediaman.
