

UNIVERSITI TUN HUSSEIN ONN MALAYSIA

**FINAL EXAMINATION
SEMESTER II
SESSION 2017/2018**

COURSE NAME : AUTOMATION SYSTEM
COURSE CODE : BNJ 30803
PROGRAMME CODE : BNK
EXAMINATION DATE : JUNE / JULY 2018
DURATION : 2 HOURS 30 MINUTES
INSTRUCTION : ANSWERS **FOUR (4)** QUESTIONS ONLY

TERBUKA

THIS QUESTION PAPER CONSISTS OF **SEVEN (7)** PAGES

- Q1** (a) Explain **THREE (3)** categories in terms of the human participation in the processes performed by the manufacturing system. (6 marks)
- (b) Propose three phase how to introduce of new products use automation migration strategy. (7 marks)
- (c) Discuss classification or types of industrial automation. (12 marks)
- Q2** (a) Differentiate between hydraulic and pneumatic automation system. (6 marks)
- (b) **Figure Q2 (b)** shows the basic circuit hydraulic system of a machine. List the components according to a given letter. Explain the operation of the machine work. (9 marks)
- (c) The main purpose of the circuit "bleed off" is to control the flow pressure of the pump does not respond directly to the load. Develop the circuit. (10 marks)
- Q3** (a) The latching or self holding circuit is used for ensuring the supply of electricity to the electro pneumatic components. Illustrate **ONE(1)** example of circuit that apply latching concept. (10 marks)
- (b) A packaging labeling machine uses two double acting pneumatic cylinders. The first cylinder extends fully and sticks the label on to a medicine bottle. This pneumatic cylinder will return after the full extension is acknowledged. Then, a second double acting cylinder will extend and push the labeled bottle away. Develop the electro pneumatic circuit and the displacement diagram. (15 marks)

TERBUKA

- Q4** (a) Explains between logic control and sequencing for the categories of discrete control. (5 marks)
- (b) **Figure Q4(b)** shows an automatic packaging machine for packing ten apples in one box. An counter use to count the number of apples. Refer the device list as shown in the **Table 4(b)**, shows the ladder diagram (Program control circuit) and working operation. (20 marks)
- Q5** (a) List **NINE (9)** principles of material handling. (9 marks)
- (b) A unit load is the single item picked up and moved between two locations. Propose the steps that must be taken when to design the unit load. (6 marks)
- (c) Discuss the transportation system components for material handling below:
- (i) conveyors
 - (ii) industrial vehicles/truck
 - (iii) monorails, elevator, cranes and hoists
 - (iv) auxiliary
- (10 marks)

TERBUKA

Q6 (a) Propose the reasons why we need to use robot in the packaging industry
(5 marks)

(b) **Table Q6 (b)** shows the device list used at a plant and **Figure Q6 (b)** shows a simulation automatic packaging machine. The machine is designed to move a object from P4 → P3, object from P5 → P6, object from P2 → P4 and object from P6 → P7.

Based on the sequence operation of one manufacturing cell which is control by robot, develop:

(i) the programming file (MB4 file)
(15 marks)

(ii) the programming until object back to original position.
(5 marks)

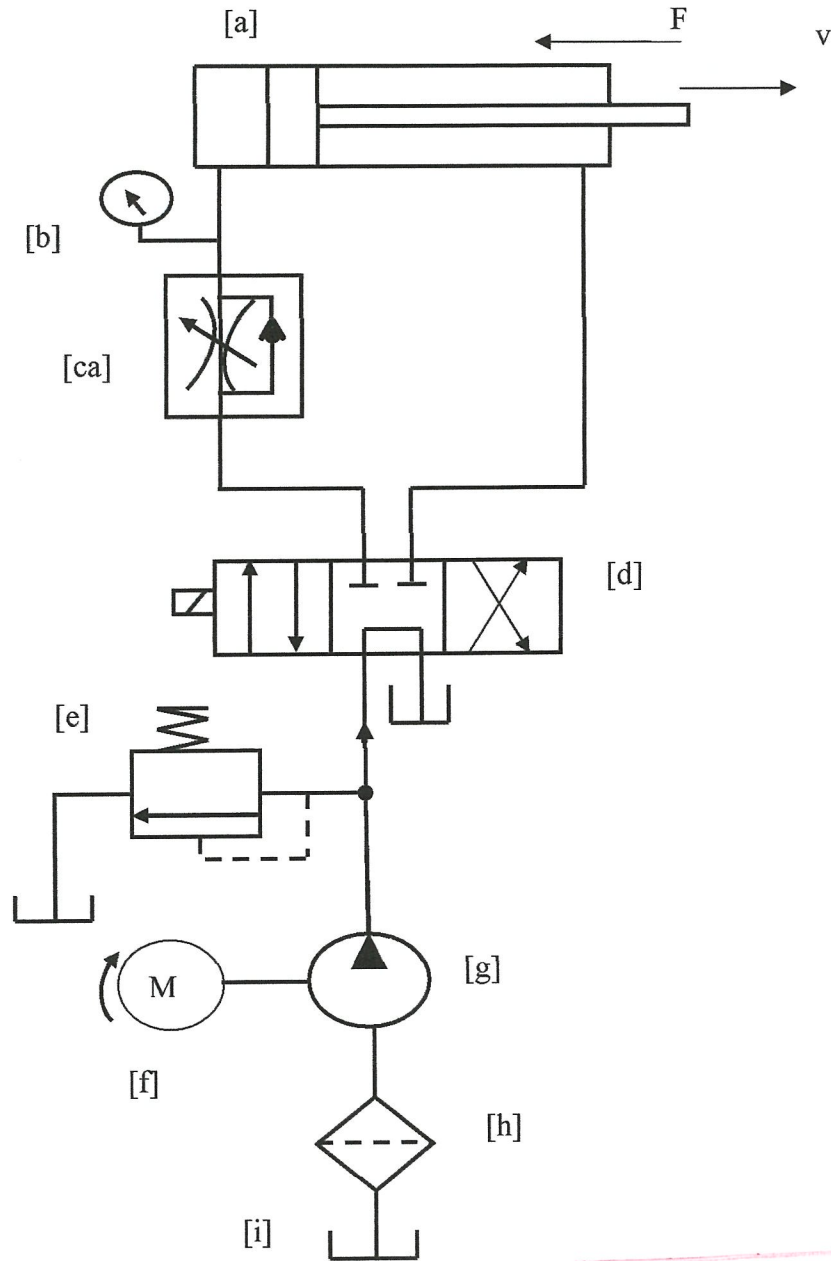

- END OF QUESTIONS -

TERBUKA

FINAL EXAMINATION

SEMESTER/ SESSION : SEM II/ 2017/2018
COURSE : AUTOMATION SYSTEM

PROGRAMME : BNK
COURSE CODE : BNJ 30803

TERBUKA

Figure Q2 (b)

FINAL EXAMINATION

SEMESTER/ SESSION : SEM II/ 2017/2018
 COURSE : AUTOMATION SYSTEM

PROGRAMME : BNK
 COURSE CODE : BNJ 30803

Table Q4 (b): Device list

Device	Function
IR000.00	Start button: NO button
IR000.01	Stop button: NC button
IR010.01	Box Sensor: to take the box when motor of an conveyor is activated by start button
IR010.00	Apple Sensor: conveyor with apple starts moving when a box is detected by box sensor
IR000.02	Apple sensor: allow counter to count 10 apples
IR000.03	Box sensor: to resets counter which is again ready to count 10 apples.
CNT010	Counter: to count the numbers of apples depend on setting

FINAL EXAMINATION

SEMESTER/ SESSION : SEM II/ 2017/2018
COURSE : AUTOMATION SYSTEM

PROGRAMME : 3 BNK
COURSE CODE : BNJ 30803

Table Q6 (b): Device list

Num. Item	Device	Num. of Unit
1	Robot arm	1
2	Conveyor	2
3	Table	2
4	CNC Machine (P3)	1

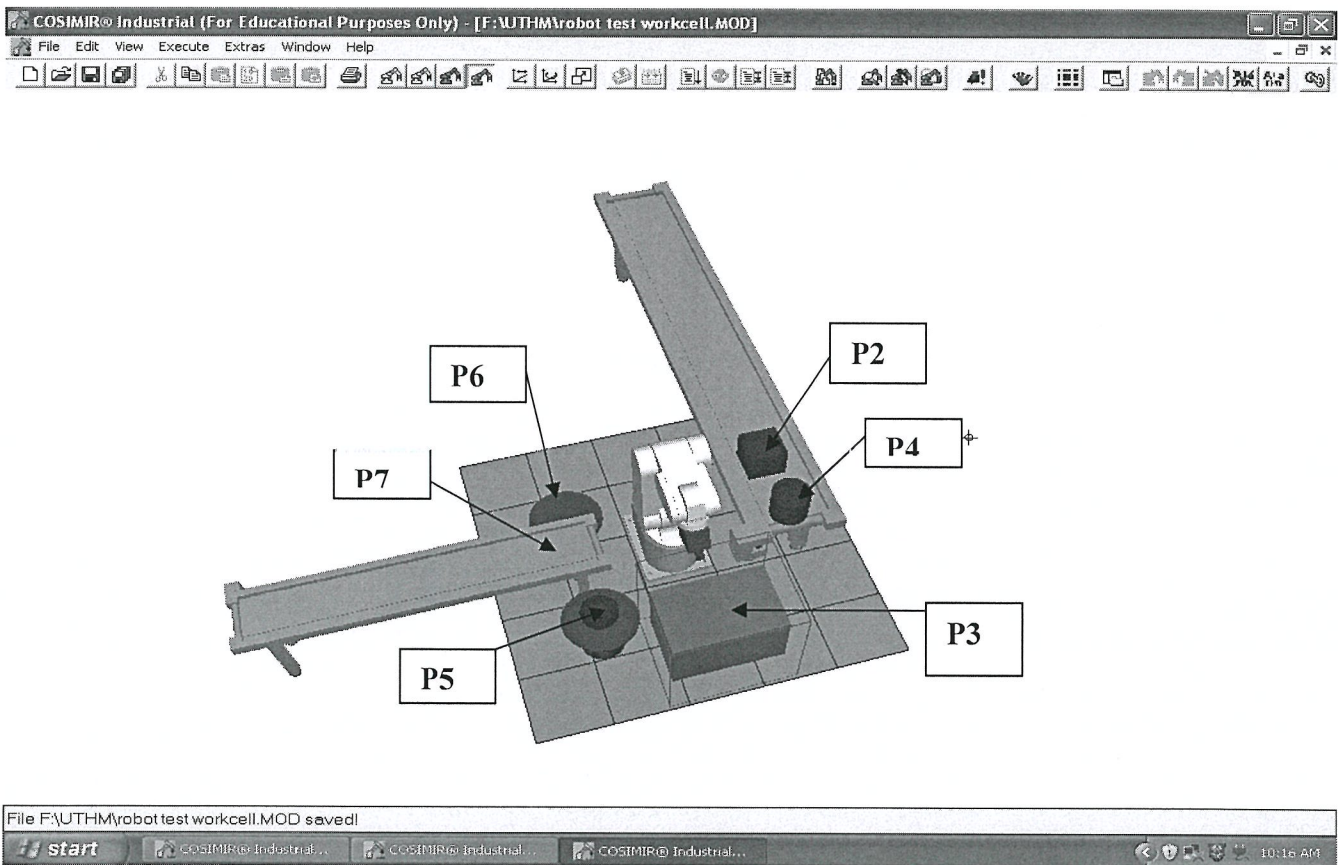

Figure Q6 (b)
